

The background of the entire page is a photograph of a flat roof with several large, rectangular, black-framed rooflights. The roof is covered in a blue-grey waterproofing membrane. In the background, there is a dense line of green trees and foliage. The sun is visible in the upper right corner, creating a warm, golden glow and casting long shadows across the roof and trees.

01. INFINITY FRAMED ROOFLIGHTS

The INFINITY Rooflights are designed to increase the flow of natural light into indoor spaces.

These rooflights are low-maintenance with excellent thermal insulation and light transmission, making them a superior choice for energy efficiency. Our energy-efficient glass prevents heat from escaping, ensuring optimal thermal performance.

Double glazed units have a U-value of up to 1.0 W/m²K, and triple glazed units offer a U-value of up to 0.5 W/m²K. All units are Argon gas-filled with Thermal Super Spacer technology for better sound reduction and thermal efficiency. Available in clear, solar, or privacy glass.

ALL INFINITY FRAMED ROOFLIGHTS ARE FULLY ENCAPSULATED AND WEATHER PROOF

WATER TIGHT

Seamless design ensures exceptional water tightness. Leak-free rooflights.

AIR TIGHT

Seamless design ensures exceptional air tightness

SAFETY GUARANTEED

Robust construction guarantees maximum safety and durability.

01. INFINITY FRAMED ROOFLIGHTS

KEY FEATURES

Thermal Toughened Safety Glass:

Available in 6mm double glazed (U-Value up to 1.0 W/m²K) and triple glazed (U-Value up to 0.5 W/m²K) options.

Solar Control Glass: Blocks a significant amount of ultraviolet (UV) light, which helps protect damage caused by prolonged exposure to sunlight.

Decorative Border:

Comes with a black (RAL 9005) decorative border as standard, with other RAL colours available upon request.

Low Emissivity (Low-E) Glass:

Reduces the heat transfer through the glass and keeps indoor temperatures more consistent, leading to lower energy costs for heating and cooling.

Aluminium Frame with Thermal Break:

Anthracite Grey (RAL 7016) or Black (RAL 9005) aluminium frame featuring a thermal break to reduce condensation and improve energy efficiency.

Standard and Bespoke Sizes:

Available in both standard and custom sizes for easy and quick installation.

Range of Glass Choices:

Offered in clear, solar or privacy glass.

Toughened Safety Glass:

Ensures durability and safety.

Enhanced Sound Reduction:

Units are Argon gas-filled with Thermal Super Spacer technology.

INFINITY FRAMELESS ROOFLIGHTS

Frameless flat rooflights are an alternative to traditional framed rooflights. While installation is generally more straightforward with our framed options, frameless rooflights remain a viable choice for those looking to balance aesthetics and budget.

Frameless flat rooflights provide an affordable alternative to traditional framed rooflights while still offering a clean and modern look. Designed to maximise natural light, frameless rooflights integrate seamlessly into the architecture of any space, providing an unobstructed view without a visible frame.

Though more budget-friendly, these rooflights maintain high standards of thermal efficiency, safety, and durability. They are ideal for projects where cost-effectiveness is a priority, ensuring a bright and open environment that allows for a practical yet stylish connection to the sky above.

Double glazed units have a U-value of up to 1.0 W/m²K, and triple glazed units offer a U-value of up to 0.5 W/m²K. All units are Argon gas-filled with Thermal Super Spacer technology for better sound reduction and thermal efficiency.

Available in clear, solar or privacy glass.

02. INFINITY FRAMELESS ROOFLIGHTS

KEY FEATURES

High Class Polished Edge Finish:

Each rooflight is manufactured with a premium polished edge finish.

Thermal Toughened Safety Glass:

Available in 6mm double glazed (U-Value up to 1.0 W/m²K) and triple glazed (U-Value up to 0.5 W/m²K) options.

Solar Control Glass: Blocks a significant amount of ultraviolet (UV) light, which helps protect damage caused by prolonged exposure to sunlight.

Decorative Border:

Comes with a black (RAL 9005) decorative border as standard, with other RAL colours available upon request.

Energy Efficient Glass:

Designed to prevent heat loss, ensuring optimal thermal performance.

Standard and Bespoke Sizes:

Available in both standard and custom sizes for easy and quick installation.

Range of Glass Choices:

Offered in clear, solar or privacy glass.

Enhanced Sound Reduction:

Units are Argon gas-filled with Thermal Super Spacer technology.

INFINITY WALK-ON ROOFLIGHTS

INFINITY Walk-on Rooflights are ideal for roof terraces and basement conversions, offering a seamless integration of style and functionality.

Crafted to be installed both internally and externally, these rooflights allow natural light to flood into spaces while maintaining excellent thermal properties. Their robust design ensures durability and safety, making them perfect for high-traffic areas.

04. INFINITY WALK-ON ROOFLIGHTS

KEY FEATURES

Load/Weather Tested:

Complies with PAS24 – 2016 and BS6375 standards, ensuring durability and safety in various weather conditions.

Anthracite Grey Aluminium Frame:

Glazed into a thermally broken aluminium frame (Grey RAL 7016 or Black RAL 9005) to minimise heat transfer and reduce condensation.

Triple Heat Soak Toughened Laminated Glass:

Ensures maximum strength and safety with a 33mm thick glass featuring an Argon gas-filled cavity and thermal spacer.

Decorative Border:

Comes standard with a black (RAL 9005) decorative border, other RAL colours available upon request.

Glass Finishes:

Available in clear, opaque and anti-slip finishes to suit different aesthetic and functional needs.

U-Value up to 1.0:

Provides excellent thermal insulation, enhancing energy efficiency.
